Office Action Summary

Art Unit: 3652

Detailed Action

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

2. Claims 1, 2, 3, 5, 6, 7, 8, 9, 10, 11, 13, 14, 15, 16, 17, 18 and 20 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Burton.

Note Burton, column 4, lines 6-8. Also note cylinder 47 in Burton.

Regarding claims 3, 11 and 18, the outer end of 43 in Burton comprises a support plate.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later

Art Unit: 3652

invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 4, 12 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Burton in view of Bloom, Jr..

It would have been obvious to one having ordinary skill in the art at the time of applicants' invention to substitute an hydraulic cylinder for the actuator in Burton in view of the teaching in Bloom (element 60).

6. Applicant's position that Burton fails to teach that the pins can be seen by the operator from the cab has been carefully considered but is not deemed persuasive. The law does not require the reference to use verbatim the language chosen by applicants. The reference is viewed for its teaching including inherency and logical reasoning. While the examiner is of the opinion that lines 6-8 in column 4 teach the invention, certainly when viewed together with the comments in lines 22-36 that one of the drawbacks in the prior art is the need for the operator to leave the vehicle, one must reason this reference teaches the invention.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 3652

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

8. Any inquiry concerning this communication should be directed to D. Underwood 308-1113 at telephone number (703) 308-1112.
